🎓 EDUCATION

B.Tech in Computer Science and Engineering

Saraswati College Of Engineering

09/2023 – 04/2027

Kharghar, Navi Mumbai, India

Currently pursuing my B.Tech and studying in 3rd-year in field of Computer Engineering with a strong interest in cybersecurity, web development, and computer networking. I enjoy understanding how systems work at both the application and network levels, and I focus on building secure, efficient, and scalable solutions. Having good knowledge in Python, JavaScript, and modern frameworks including React.js and Node.js. Passionate about writing clean, scalable code and exploring the intersection of security and software engineering. I'm eager to deepen my technical expertise through hands-on projects, real-world problem solving, and collaboration with like-minded developers and security enthusiasts.

👤 PROFILE

I am a B.Tech student in Computer Science and Engineering with a strong foundation in web development, cybersecurity, and computer networking. I am passionate about building secure, efficient, and scalable systems while exploring emerging technologies in the security and networking domains. With a focus on clean coding practices, practical problem-solving, and continuous learning, I aspire to become a skilled software engineer who designs reliable solutions that address real-world challenges.

📁 PROJECTS

CyberShield Phishing Detection System

09/2025 – 10/2025

- CyberShield is an intelligent phishing detection system designed to identify and prevent phishing attacks in real time.
- It leverages machine learning and natural language processing to analyze URLs, emails, and website features for malicious behavior.
- The system provides users with instant alerts about suspicious links or messages, enhancing cybersecurity awareness and protecting sensitive data from online threats.

Hair Cut App

An Android Application using Flutter Dart

12/2024 – 09/2025

- Built a dynamic salon booking application with Flutter, integrating features like service selection, time slots, and interactive UI.
- Gained experience in Flutter widgets, app architecture, and responsive design, enhancing practical mobile app development skills.

Weather Forecast and Precautionary Measures

An website for real time fetching weather information with precautionary measures and real time alerts through sms

10/2024 – 02/2025

- Developed a weather forecast and precautionary measures website using HTML, CSS, JS and XAMPP server, implementing real-time API data fetching and SMS alerts.
- Learned about state management, asynchronous programming, and API integration in mobile app development, and also learn about Twilio sms service.

Amazon Clone

Clone of Amazon Website

- Recreated Amazon's core UI/UX including product listing pages, cart functionality, and checkout flow using vanilla HTML, CSS, and JavaScript — a strong foundation project.

SKILLS

Programming Languages

C, C++, Java, Python, JavaScript, SQL

Web Development & Frameworks

HTML5, CSS3, JavaScript, React.js, Node.js, Express.js

Cybersecurity

Basic of Ethical hacking, Networking, Wireshark, Linux, Kali Linux, Pentesting

Networking

Basic understanding of networks, ip addresses, TCP/IP, Subnetting, IP Addressing, Network Topologies, Virtualization

Tools & Platform

Git, GitHub, VS Code, Postman, Android Studio, Twilio API

COURSES

Ethical Hacking 101

Simplilearn Skillup

06/2026 – 06/2026

Gained foundational knowledge of ethical hacking, penetration testing methodologies, reconnaissance, network scanning, vulnerability assessment, threat identification, and cybersecurity best practices for securing systems and networks.

Introduction to Cyber Security

Simplilearn Skillup

05/2026 – 05/2026

Studied cybersecurity fundamentals, cyber threats, malware, phishing attacks, network security concepts, and security best practices for protecting systems and data.

- Implemented local storage-based cart persistence, product filtering by category, and responsive grid layout compatible with mobile viewports.

SecureVault — Password Manager & Encryption Tool

Built a desktop password manager with AES-256 encryption (via Python cryptography library) to securely store and retrieve credentials with a master-password-protected vault.

- Designed intuitive Tkinter GUI allowing users to generate strong passwords, categorize entries, and export encrypted backups zero plaintext storage at any point.
- Implemented clipboard-clear mechanism (auto-wipe after 30 seconds) to mitigate clipboard hijacking attacks, demonstrating security-first development thinking.

CERTIFICATES

Code Carnage GeeksforGeeks

Participated in code Carnage an event organised by GeeksforGeeks and Alexa Developers Community Chandigarh University

Introduction to Cyber Security

Completed an Simplilearn skillup Introduction to Cyber Security and learned cybersecurity fundamentals including network security, cyber threats, malware, phishing, and security best practices.

Ethical Hacking 101

Simplilearn SkillUp

Completed certification covering ethical hacking fundamentals, penetration testing concepts, reconnaissance techniques, vulnerability assessment, and responsible cybersecurity practices.
